Correspondent on National Public Radio

Board Member of the Covenant of Unitarian Universalist Pagans

Presentation followed by dialogue and experiential ritual

Women and the Revival of Religions of the Earth

For the past 25 years, there has been a growing movement to revive religions of nature, those based not on a set of rigid beliefs, on prophets or books, but on the cycles of nature. Margot will discuss how women are involved in creating this new religious movement, how they are influencing its direction and how they are dealing with its problems and conflicts as it grows and spreads to traditional denominations and different religious traditions.
